

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Withdrawn) A device associated with a cap having a bill, which allows a wearer to selectively view objects through a lens, comprising:
a mounting member adapted to be removably attached to the bill of the cap; and
an eye shield including the lens pivotally attached to the mounting member so as to be selectively positionable relative to eyes of the wearer
2. (Withdrawn) The device of claim 1, wherein the mounting member comprises a sleeve adapted to removably receive a bill of the cap therein.
3. (Withdrawn) The device of claim 1, wherein the mounting member comprises a clip for removable attachment with the bill of the cap.
4. (Withdrawn) The device of claim 3, wherein the clip comprises a plurality of elongated arms, at least one elongated arm being positionable above the bill, and at least one elongated arm being positionable below the bill so as to retain the bill between the upper and lower elongated arms.
5. (Withdrawn) The device of claim 1, including a hinge assembly interconnecting the mounting member and the eye shield.

6. (Withdrawn) The device of claim 5, wherein the hinge assembly comprises a base attached to the mounting member, an articulating body attached at a first end thereof to the base and at a second end thereof to an eye shield connector.

7. (Withdrawn) The device of claim 6, wherein the articulating body is removably attached to the base.

8. (Withdraw) The device of claim 6, wherein the connector is removably attached to the articulating body.

9. (Withdrawn) A device which allows a wearer to selectively view objects through a lens, comprising:
a visor having a bill; and
an eye shield including the lens removably attached to the bill of the visor so as to be positionable relative to eyes of the wearer.

10. (Withdrawn) The device of claim 9, including a base attached to the bill and a eye shield connector connected to the base and the eye shield.

11. (Withdrawn) The device of claim 10, wherein the connector is removably connected to the base and the eye shield.

12. (Withdrawn) The device of claim 10, including an articulating body attached at a first end thereof to the base and at a second end thereof to the eye shield connector.

13. (Previously presented) A device associated with a cap having a bill, which allows a wearer to selectively view objects through a lens, comprising

a mounting member adapted to be removably attached to the cap; and
a face shield attached to the mounting member and supporting the
lens thereon such that the lens is positionable relative to eyes of the wearer.

14. (Previously presented) The device of claim 13, wherein the
mounting member comprises a sleeve adapted to removably receive a bill of
the cap therein.

15. (Previously presented) The device of claim 13, wherein the
mounting member comprises a shell adapted to overlie at least a portion of
an exterior surface of the cap.

16. (Previously presented) The device of claim 13, wherein the lens is
removably attached to the face shield.

17. (Previously presented) The device of claim 13, wherein the lens is
positionable along at least a length of the face shield to be positioned relative
to the wearer's eyes.

18. (Previously presented) The device of claim 17, wherein the face
shield includes a series of generally aligned apertures which removably
receive mating protrusions of the lens by snap-fit connection.

19. (Previously presented) The device of claim 13, wherein the lens
comprises a vision correction lens.

20. (Previously presented) The device of claim 13, wherein the lens
comprises an eye shielding lens.
